MAXI LITE

PORTABLE PASSIVE LIFTER OPTIMISED
FOR VEHICLE TRANSFERS

...with people in mind

PORTABLE PASSIVE FLOOR LIFTER THAT IS FOLDABLE AND OPTIMUM FOR CAR TRANSFERS.

Vehicle transfers involving dependent patients are one of the most complicated and precarious tasks for healthcare facility staff. Limited space and awkward body mechanics make this kind of transfer particularly difficult for nurses and carers. *Maxi Lite™* is a portable lifter that ensures vehicle transfers are always comfortable, safe routines.

This highly versatile lifter can be used in the emergency room, group home or nursing facility as an ideal solution for all daily lifting needs. When not in use, the lifter folds up into a compact unit for easier portability and to reduce required storage space. The adjustable chassis legs enable the lifter to pass through standard doorways and to fit around armchairs and wheelchairs during transfers.

Delivered fully assembled, Maxi Lite has a safe working load (SWL) of 160 kg. The lifter is supplied with either an integrated charger or a wall-mounted charger, depending on needs and frequency of use.

The lifter's remarkably small footprint does not compromise its high lifting stroke, as the unique flat manual spreader bar enables both a higher lifting height and good legroom for the patient or resident.

In combination with the distinctive clip slings, the flat spreader bar provides optimum support and stability, giving the patient a feeling of security and safety during all supine and seated transfers.

Maxi Lite is equipped with both pillar-mounted and handset controls for ease of use during all activities including bed, wheelchair and vehicle transfers and lifting from the floor.

Features:

- Integrates with most vehicle types
- Folds up for storage
- Integrated charger or optional wall-mounted charger
- Adjustable chassis legs
- Emergency power shut-off

Product information

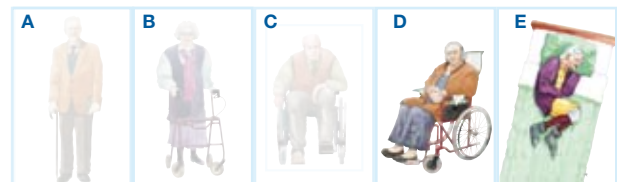

Max. safe working load (SWL)	160 kg (350 lbs)
Lifting stroke	527 mm (20.7")
Min. lifting height (medium DPS)	1278 mm (50.3")
Max. lifting height	1805 mm (71.1")
Base total length	1090 mm (42.9")
Base height	112 mm (4.4")
Base floor clearance	48 mm (1.9")
Product weight	42 kg (92 lbs)
Battery	Two 12V, 5Ah (24V capacity)
Protection class	Handset IP44 Lifter IP21
Emergency stop and lowering	

Approvals

The product is in compliance with current legislation and applicable product standards.

Mobility Gallery

Suitable for Doris and Emma

D Doris, who has no capacity to support herself

E Emma, who is almost completely bedridden and totally dependent
